LANGUAGES

- English: B2 (Certified)
- Spanish: Native
- Basque: Native (EGA)

TECH STACK

ANALYTICS & DATA

Power BI, Python (Pandas/NumPy), SQL, Excel Advanced.

DEVELOPMENT

JavaScript, NextJS, TypeScript, FastAPI, Git.

INDUSTRIAL / CLOUD

Electrical/Electronic Eng., Docker, Azure Basics.

PROFESSIONAL SUMMARY

Graduate in Electrical & Electronics Engineering with a strong focus on Data Analytics and Full-stack Development. Experienced in monitoring industrial KPIs and automating reporting processes using Python and Power BI. Passionate about bridging the gap between hardware engineering and modern software solutions like AI and Machine Learning.

PROFESSIONAL EXPERIENCE

Technical Support & Data Analyst (Intern)

2023 - 2024

EuroSort Automation

- Monitored production deviations and plant KPIs, generating automated weekly reports.
- Developed Python scripts to clean and visualize sensor data, improving analysis speed by 30%.
- Communicated technical variances to international clients in English.

Junior Full-Stack Developer (Projects)

2022 - 2023

Joinrs Tech Academy / Independent Projects

- Designed and implemented responsive web interfaces using NextJS and TypeScript.
- Developed a predictive model for energy consumption using Scikit-learn during a final year project.
- Integrated REST APIs with Flutter for mobile application prototypes.

EDUCATION

Degree in Electrical and Electronics Engineering

Universidad del País Vasco (UPV/EHU) - Specialized in Industrial Automation.

Specialization in AI & Big Data (600h)

DigiTech Madrid - Focused on Machine Learning and Cloud Architectures.

CORE STRENGTHS

- Proactive problem-solver with a background in Health & Safety regulations.
- Fast learner of new frameworks (NextJS, CrewAI, Kubernetes).
- Highly detail-oriented in incident tracking and code documentation.
