

Artificial Intelligence Research Internship

RESEARCH
INTERNSHIP

SpotLab • Madrid, Spain

THE ADVENTURE

SpotLab is an award-winning MedTech spin-off from UPM dedicated to democratizing medical diagnostics. We bridge the gap in healthcare by turning smartphones into powerful diagnostic tools using AI and telemedicina. Join our multidisciplinary "orchestra" to develop breakthrough innovations with global impact—from hematology to infectious diseases like Malaria and Ebola.

MAIN RESPONSIBILITIES

- **Algorithm Development:** Build solutions for medical image analysis using Neural Networks, Computer Vision, and LLMs.
- **Data Orchestration:** Clean and organize medical datasets and ground truth for pipeline evaluation.
- **Clinical Interaction:** Collaborate with medical specialists to assess technical feasibility of new features.
- **Deployment:** Work with engineering to deploy models in real-time operational conditions (Edge AI).
- **Documentation & Research:** Help draft technical documentation and support experiment planning/execution.

REQUIRED SKILLS & QUALIFICATIONS

Core Technical:

- Strong Python skills (Scientific ecosystem).
- Deep Learning: PyTorch, TensorFlow, or Keras.
- Knowledge of WandB for experiment tracking.
- Familiarity with Git and version control.

Nice to have:

- MSc in Computer Science, Math, or Physics.
- Experience with Medical Imaging (DICOM/NIfTI).
- Knowledge of Edge AI or GPU programming.
- Experience with LLMs and NLP.

Ideal Candidate Profile:

We seek a dreamer's soul with an empathic heart. You should be willing to share bold ideas, stay persistent through uncertainty, and dare to "walk the unwalkable" to create positive global impact.
