

AI Technical Lead

THE OPPORTUNITY

Etalentum is the leading recruitment firm in Spain. As part of our expansion plan, we are looking for an **AI Specialist** to join our Central team in **Madrid**. You will be responsible for leading the architecture and development of intelligent systems designed to optimize our core business (Recruitment & HR Tech).

KEY RESPONSIBILITIES

- **Design & Discovery:** Analyze internal processes (screening, matching, data extraction) to identify AI-driven improvements.
- **Model Development:** Prepare datasets and train **NLP** and Machine Learning models tailored to HR data (CVs, job vacancies).
- **Semantic Search:** Lead the creation of intelligent candidate search tools using semantic filtering techniques.
- **Deployment:** Deploy models as API-accessible services using **Docker** and cloud architectures.
- **Monitoring:** Supervise model performance in production, ensuring scalability and security.

REQUIRED TECHNICAL PROFILE

- Expertise in **Python** development throughout the full software life cycle.
- Solid knowledge in **NLP** (embeddings, classification, generative models).
- Hands-on experience with **Vector Databases** (Pinecone, Weaviate, Milvus).
- Experience creating and consuming REST APIs.

LOCATION

Madrid (Hybrid - 2 days on-site)

ENGLISH LEVEL

C1 - Advanced (Mandatory)

SALARY RANGE

€40,000 gross/year (Initial)

EXPERIENCE

2 - 3 Years

CORE BENEFITS

- **Autonomy:** Technical freedom to choose cloud architectures (Vertex AI / GCP).
- **Resources:** Budget for paid APIs (OpenAI, Anthropic) and vector licenses.
- **Balance:** Friday afternoons off (intensive morning shift).
- **Stability:** Permanent contract from day one.

TECH STACK

Python
