

Cloud Operations Engineer

Global Digital Solutions • Madrid, Spain (Hybrid)

Job Ref: MAD-77291
Type: Full-time / Permanent

THE ROLE

We are seeking a high-performing **Cloud Operations Engineer** to join our infrastructure team in Madrid. You will be responsible for ensuring the reliability, scalability, and performance of our multi-cloud environments, working closely with DevOps and Engineering teams to deliver seamless digital services.

KEY RESPONSIBILITIES

- Manage and monitor production environments in **AWS/Azure**.
- Design and maintain CI/CD pipelines to automate software delivery.
- Perform advanced troubleshooting and root cause analysis (RCA) for complex incidents.
- Optimize cloud costs and resource allocation through rightsizing and automation.
- Collaborate in the migration of legacy workloads to containerized architectures (Kubernetes).

TECHNICAL SKILLS

- Expertise in **Linux Administration** and Scripting (Python/Bash).
- Deep understanding of Cloud Networking (VPC, Peering, VPN, Route53).
- Hands-on experience with **Docker and Kubernetes (EKS/AKS)**.
- Proficiency with Infrastructure as Code (Terraform) and Configuration Management (Ansible).

Est. €45,000 - €55,000 gross/year

CANDIDATE PROFILE

- Degree in Computer Science or related field.
- **English C1** (Mandatory).
- AWS/Azure Certifications are a plus.
- **On-call availability** (1 week/month).
- Experience in Monitoring (Datadog/ELK).
