

DATA SCIENTIST - LIGHTHOUSE (CENTER OF EXCELLENCE)

LIGHTHOUSE Center of Excellence • Madrid (One Tech Hub)

REQUIREMENT: ENGLISH C1 (Accredited Certification Required)

THE MISSION

As part of the **LIGHTHOUSE** team, you will extract value from data to support strategic decision-making. You will design data modeling processes, algorithms, and predictive models that drive efficiency and high performance for global clients in our Data & Analytics and AI Center of Excellence.

CORE RESPONSIBILITIES

- Design and deploy predictive models, time series, and neural networks.
- Develop analytical solutions in Cloud environments (Azure, AWS, GCP).
- Align data strategy with corporate goals and ensure data governance.
- Lead technical delivery and mentor junior data science profiles.
- Expertise in MLOps lifecycle management using Azure Machine Learning.
- Ensuring AI ethics, confidentiality, and regulatory compliance.

TECHNICAL SKILLS

- Proficiency in **Python, R, SQL, and Spark**.
- Experience with Big Data architectures: **Databricks & Hadoop**.
- Advanced Deep Learning and NLP/Computer Vision knowledge.
- Visual analytics using **Power BI and Tableau**.

CANDIDATE PROFILE

- **Experience:** 2 to 5 years in similar roles.
- **English:** Level C1 (Fluent/Business).
- **Cloud:** Strong focus on **Azure/Databricks**.
- **Ethics:** Focus on XAI (Explainable AI).

WHY KPMG?

- 31 business days of vacation + Birthday afternoon off.
- Hybrid work model & Flexible remuneration plan.
- Global networking & international career opportunities.
- Access to Kteam (Well-being & benefits platform).
- Continuous training (Udemy, Microsoft Certifications).
