

Intern Master Data OneERP – EBX (f/m/d)

Axpo | Madrid, Spain (Hybrid) | Internship

The Opportunity

Join Switzerland's largest producer of renewable energy and a global leader in energy trading. As an intern in our **Master Data Global ERP team**, you will bridge the gap between technical engineering and business processes, ensuring our data remains a strategic asset during our "OneERP" transformation.

What You Will Do

- **Data Quality & Governance:** Monitor and improve Master Data for Business Partners within the TIBCO EBX environment.
- **Python Development:** Write scripts (Pandas, Openpyxl) to automate data validation and cleaning tasks.
- **Databricks Integration:** Assist in unlocking the *Master Data Data-spot* by managing data flows between EBX and Databricks.
- **Reporting:** Develop and maintain KPIs and dashboards (Power BI/Excel) to track process efficiency.
- **Global Collaboration:** Work with international stakeholders to support advanced data migration into SAP S/4HANA.

Your Profile

- Current student or recent graduate in **Data Engineering, IT, or Data Science**.
- Proficient in **Python**; knowledge of AI agents or automation scripts is a significant advantage.
- Strong analytical mindset with high attention to detail.
- **Language Skills:** Fluent in English (working language). Spanish is required for the local office; German is a plus.
- Familiarity with SQL or ERP environments (SAP) is highly valued.

Why Axpo?

We offer a dynamic, innovative environment where your creativity is valued. You will gain hands-on experience with cutting-edge technologies like **Databricks** and **S/4HANA** while contributing to the global energy transition.
