

Junior Data Consultant

Ultra Tendency • Global Data Engineering Consultancy

THE OPPORTUNITY

Join our international team to design and implement scalable data architectures using the **Databricks Lakehouse Platform**. Mentored by experts, you'll work on cutting-edge projects for global enterprises.

WHAT YOU'LL DO

- Implement data pipelines using **Apache Spark and Delta Lake**.
- Learn Unity Catalog and best practices in governance.
- Collaborate in global agile squads on cloud modernizations.
- Contribute to open-source (Ansible, Terraform, Kafka).

WHAT YOU'LL BRING

- Solid foundational knowledge of **Python** and SQL.
- Understanding of distributed computing (PySpark).
- Exposure to Cloud (Azure, AWS, or GCP).
- **English Proficiency:** C1 level is mandatory.

Mandatory Portfolios:

Must provide links to **GitHub** (clean code samples) and **Kaggle** (competition participation or kernels).

EST: €28,000 - €35,000 gross/year

BENEFITS

- **100% Remote** (Spain residence).
- **Unlimited Udemy Business**.
- Paid Professional Certifications.
- Private Health Insurance + Dental.
- **Home Office Stipend:** €50/month.
- Ticket Restaurant & Gym discounts.
