

STAFF AI / DATA ENGINEER

Superside • Superads - AI Agent Division • Fully Remote (Global)

THE MISSION

Superads is building AI agents that reason through strategy on behalf of marketers. We aren't just parsing documents; we are building a **Knowledge Layer** that understands brand identity, creative principles, and instinctive judgment calls. Your challenge is to represent what a brand *actually is* so an AI can make meaningful decisions reliably.

KEY RESPONSIBILITIES

- **Knowledge Layer Architecture:** Design and build the core systems that enable agents to "reason" rather than just "retrieve."
- **Agentic Search:** Develop dynamic systems that identify knowledge gaps and navigate information autonomously.
- **Memory Systems:** Implement sophisticated architectures for reasoning under uncertainty and managing long-term brand memory.
- **RAG Optimization:** Evolve current RAG patterns into production-ready workflows that prioritize reliability and trust.
- **Research to Production:** Translate the latest AI papers into scalable code within our Python/FastAPI stack.

WHAT YOU NEED

- **Experience:** 8+ years in high-performance engineering, specifically with enterprise AI or agentic systems.
- **Technical Mastery:** Advanced Python, FastAPI, and expertise in multi-agent frameworks (LangGraph, LangChain).
- **Data Infrastructure:** Proficiency in Snowflake, BigQuery, or Databricks at scale.
- **Advanced RAG:** Deep understanding of embedding models, vector databases (Pinecone/Weaviate), and semantic chunking strategies.
- **Evaluation & Testing:** *(Added)* Proven experience using LLM evaluation frameworks (e.g., Ragas, Arize Phoenix) to iterate on agent accuracy.
- **Ownership:** A high-performance, low-ego mindset with a passion for solving the "Creative Judgment" problem.

CORE TECH STACK

Python

FastAPI

LangGraph

Vector DBs

Snowflake

LLM Reasoning

Agentic Workflows

Cloud Data Platforms

WHY SUPERSIDE?

We are a remote-first company with 700+ team members across 60 countries. We offer a high-trust environment where your ideas shape the future of the creative industry. **Impact meets opportunity:** help us build the brains behind the next generation of creative AI.

Superside is an equal opportunity employer. We use AI to support our hiring process, but final decisions are always made by humans.
