

JUNIOR DATA SCIENTIST / ML ENGINEER (FREELANCE)

THE ROLE

At **Xenon7**, we bridge the gap between AI hype and real-world implementation. We are seeking a motivated **Junior Freelance Data Scientist** to support our engineering team in building advanced ML solutions for supply chain and inventory management.

This is a unique opportunity for a talented early-career professional to work on international projects, helping global enterprises optimize their logistics through AI and Data Engineering.

KEY RESPONSIBILITIES

- Assist in the design and development of ML models focused on **Supply Chain** (Time Series Forecasting & Inventory Management).
- Support data preparation and pipeline development using **Python**, **Databricks**, and **Snowflake**.
- Work within the **AWS ecosystem** to deploy and monitor ML solutions.
- Collaborate with senior architects to translate business requirements into technical features.
- Optimize model performance and participate in the end-to-end ML delivery process.

TECHNICAL REQUIREMENTS

- Bachelor's or Master's degree in Computer Science, Data Science, or related STEM field.
- **1-2 years of hands-on experience** (including high-level internships or personal projects) in Data Science/ML.
- Proficiency in **Python** and familiarity with SQL/Snowflake.
- Foundational knowledge of **Machine Learning algorithms** (Regression, LSTM, Time Series).
- Basic understanding of cloud platforms (AWS preferred).
- Strong interest in **Supply Chain** processes and business logic.

FREELANCE SETUP

Contract: Long-term
Freelance Agreement.

Location: 100% Remote
(Spain-based candidates preferred for time-zone alignment).

Compensation: Paid in USD
(Hourly rate based on experience).

Requirements: Valid
Freelance (Autónomo) status
in your country of residence.

TECH STACK

Python

Databricks

Snowflake

AWS

MLOps

Time Series

Inventory ML

SOFT SKILLS

- High level of English for international meetings.
- Ownership-driven mindset.
- Proactive problem solver.
